Company profile:	The Eybl Group focuses its activities exclusively on car interiors – from research	

and product development to design and production. Eybl produces and manufactures textiles for the interior equipment of cars, seat covers made of fabric, leather and fabric/leather combinations, and special interior parts. The group (sales revenue 2002: approx. EUR 410 million) supplies the majority of European car producers. With a focus on the premium classes, Eybl's high-quality products are to be found in the models of all leading car producers, especially in German and increasingly also French brands. The Eybl Group furnishes more than 2.5 million vehicles per year with seat covers or seat cover fabrics. With more than 3,200 employees, Eybl produces at nine European locations. Eybl's products are made at competence centers, which stand for international industry standards in production, flexibility and quality, with all relevant textile technologies.
